1.0	Original Release	Paula Soto	26/01/2022

Document Control and approvals are done through Drive document control.

1. Introduction

We have established this quality policy to be consistent with the purpose and context of our organization. It provides a framework for the setting and review of objectives in addition to our commitment to satisfy applicable customers', regulatory and legislative requirements as well as our commitment to continually improve our management system.

2. Quality Policy

We strongly believe in our people and their passion for doing things in a different way; a day at Aistech is exciting because passion moves us, passion is our engine for developing our company and ideas.

We fly away from the routine and the Ideas Killers leaving space for everyone in the team to fulfill their professional objectives.

We meant to create a project in which people enjoy each day and the colleagues' relations, a place to which everyone looks forward to coming back next Monday.

It is essential for us to create strong human relationships to reach our goals working in an exceptional international environment.

Continuous Improvement moves us in every step we take; learning from our mistakes is a must. We are committed to create value for our customers and for society, making the space information reachable for anyone who needs it.

Our policy is also to meet the requirements of other interested parties and to address our social, environmental, charitable, regulatory and legislative responsibilities

Action Oriented Attitude

Establishes clear authority and responsibility; directs changes while maintaining operational effectiveness; integrates efforts between people and functions; monitor results; addresses problems directly and promptly

Honesty

Act on the basis of truth, showing coherence between what is done, what is said and what is thought.

Preserve the moral and material assets of the organization and its people, treat them and ensure that they are treated with rigor, seriousness and discretion.

Be respectful with oneself and with others, fair and capable of reasoning objectively, generating trust in the environment.

Leadership

We lead in a breakthrough way.

We look for opportunities and differentiation in what we do.

We challenge the status quo by looking beyond conventional assumptions and boundaries.

We promote invention, creativity, initiative and the risk assumed to reinvent the business and / or provide added value.

Problem Solving Attitude

Analyze problems with a systematic approach and establish cause and effect relationships increasing knowledge about the problem.

It is able to develop methodologies and techniques for solving problems that improve the effectiveness of existing ones.

Has the ability to anticipate problems and adapt and improve solution techniques in anticipation of their appearance

Respect

We trust people and value all their ideas by their merit, and not by experience, level or focus.

We involve others in decisions and plans that affect them and actively support decisions once they are made.

We behave in an open manner, we help by listening to all ideas, sharing information and knowledge across the levels and boundaries of the organization.

We have produced quality objectives which relate to this policy.

This policy is available to all interested parties as well as being made available to the wider community if required.
